From the
handle
to the city:
our idea of
industrial
elegance

upDate 25

Una collezione pensata per architetti, designer e progettisti che cercano un linguaggio contemporaneo, tattile e coerente.

Ogni dettaglio è una scelta.
Ogni maniglia è un gesto che racconta una visione. Materia, forma e funzione si fondono in uno stile industriale e in un'eleganza funzionale.

A collection designed for architects, designers and creative minds seeking a contemporary and tactile design language.

*Every detail is a conscious choice.
Every handle is a gesture that tells a story.
Material, form, and function come together in an industrial style and functional elegance.*

Design Marco Redaelli

Disegnata da CRP · Centro Ricerche Pamar, questa nuova maniglia reinterpreta il motivo cannettato con un linguaggio essenziale e moderno, ispirato alle forme fluide dei più recenti accessori di un famoso brand hi-tech internazionale. Realizzata in zama pressofusa, combina solidità strutturale e precisione estetica. È disponibile in un'ampia gamma di finiture epossidiche e galvaniche, per adattarsi con coerenza a qualsiasi progetto architettonico o d'interni. Un oggetto sofisticato e materico, dove la cura del dettaglio si traduce in stile funzionale e presenza scenica.

Designed by CRP · Pamar Research Center, this new handle reinterprets the fluted motif with a clean, modern language — inspired by the flowing lines of the latest accessories from a renowned international hi-tech brand. Crafted from die-cast zamak, it offers both structural solidity and refined detailing. Available in a wide range of epoxy and galvanic finishes, it seamlessly integrates into any architectural or interior design project. A sophisticated, tactile object where precision and design meet in a statement of functional style and visual impact.

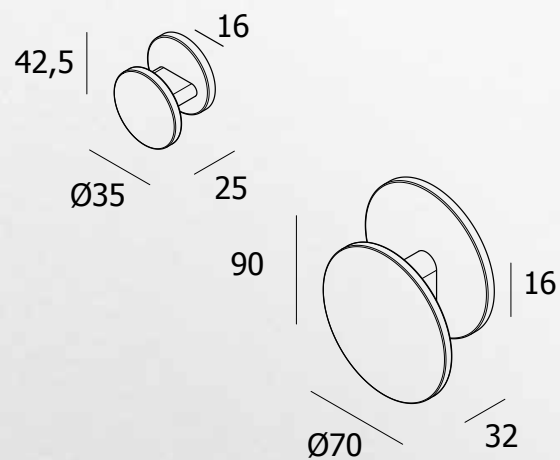

MN2653Z

Design Michele Marcon

Il pomolo “Selene”, disponibile in due diametri. Composto da due parti che rendono totalmente trasversale l’articolo in finiture e materiali. La base è infatti disponibile in legno, resina e zama, o, per un design minimal, può essere omessa.

The “Selene” knob, available in two diameters. Composed by two parts making the article completely versatile in terms of finishes and materials. The base is in fact available in wood, resin and zamak, or, for a minimal design, it can be omitted.

COLLEZIONE

RULER

Design Marco Redaelli

Essenzialità, modularità, materia.

RULER è una collezione che reinterpreta il concetto di maniglia come elemento architettonico, capace di adattarsi perfettamente a qualsiasi progetto grazie alla sua struttura componibile.

La barra orizzontale, realizzabile in legno o in alluminio (disponibile in versione liscia o rigata), è completamente personalizzabile in lunghezza. I supporti in zama pressofusa sono proposti in tre diverse altezze – large, medium e small – combinabili liberamente per creare proporzioni e ritmi visivi unici.

Una maniglia su misura, pensata per chi cerca soluzioni flessibili e di carattere, dove design e funzione si incontrano in un perfetto equilibrio.

Essential, modular, material.

RULER is a collection that redefines the handle as an architectural element, designed to adapt seamlessly to any project thanks to its fully modular structure.

The horizontal bar, available in wood or aluminium (offered in both smooth and fluted versions), can be fully customized in length. The die-cast zamak supports come in three different heights — large, medium, and small — that can be freely combined to create unique proportions and visual rhythms.

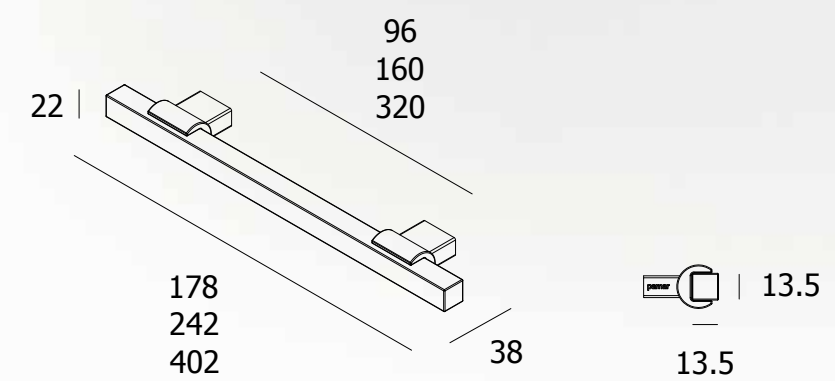

A tailor-made handle designed for those seeking flexible, character-rich solutions, where design and function meet in perfect harmony.

COLLEZIONE

PLUG

Design Michele Marcon

Design tecnico ed essenziale, pensato per la massima flessibilità.

PLUG è una collezione composta da maniglie e pomoli disponibili in due diametri – Ø12 mm e Ø20 mm – pensata per adattarsi a contesti differenti, dal residenziale al contract.

La struttura prevede diverse tipologie di attacco in zama, studiate per semplificare il montaggio e favorire la lavorazione su corpo tubolare semilavorato.

Il corpo centrale può essere realizzato in alluminio liscio, millerighe oppure in legno, offrendo una varietà materica che valorizza l'effetto visivo e tattile.

Questo approccio progettuale permette un'elevata customizzazione, sia nelle dimensioni che nelle finiture, valorizzando l'abbinamento tra funzione ed estetica. Una collezione pensata per chi cerca modularità, precisione e libertà espressiva.

A clean, technical design created for maximum flexibility.

PLUG is a collection of handles and knobs, available in two diameters – Ø12 mm and Ø20 mm – designed to adapt to various settings, from residential spaces to contract projects. The structure includes different types of zamak attachments, engineered to simplify assembly and allow easy processing of the semi-finished tubular body.

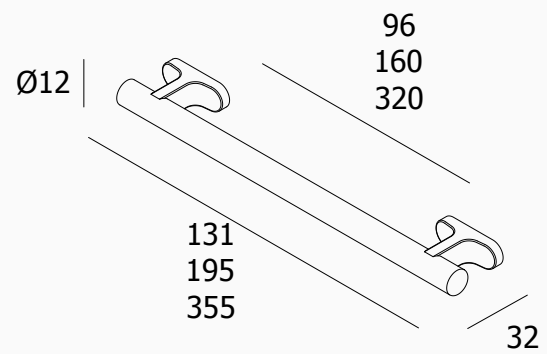

The main body can be made in smooth or fluted aluminium, or natural wood, offering both material variety and visual contrast.

This design approach enables a high level of customization in both size and finish, enhancing the balance between function and form. A collection created for those seeking modularity, precision, and expressive freedom.

Helix

Design Giuseppe Bavuso

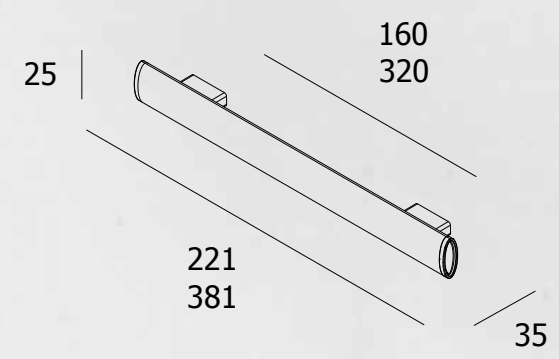

La collezione Helix, firmata da Studio Giuseppe Bavuso, è un progetto trasversale e sofisticato che supera il concetto tradizionale di maniglia per abbracciare l'Interior design nel suo insieme. Non solo pomoli e maniglie: Helix si compone di un sistema di trafilè in alluminio a sezione ellittica, pensate per integrarsi armoniosamente in diversi contesti abitativi. Dai tubi appendiabiti per cabine armadio ai maniglioni per ante scorrevoli, fino alle maniglie per cassettiere e mobili contenitori: ogni elemento della collezione è pensato per conferire eleganza, coerenza estetica e funzionalità all'ambiente. Disponibile in diverse finiture e personalizzabile su richiesta, Helix è la sintesi perfetta tra design contemporaneo e qualità industriale. Per progetti esclusivi, la collezione è disponibile anche nella variante “luxury” con rivestimento in pelle o Alcantara.

The Helix collection, designed in collaboration with Studio Giuseppe Bavuso, is a versatile and refined project that goes beyond the traditional concept of handles to embrace a complete interior design vision. Not just knobs and handles: Helix features a system of elliptical-section aluminum profiles conceived to elegantly furnish and define a variety of living spaces. From wardrobe tubes and sliding door pull bars to drawer and cabinet handles, every element of the collection is designed to ensure aesthetic coherence, functional integration, and a distinctive character. Available in a wide range of finishes and fully customizable upon request, Helix represents the perfect blend of contemporary design and industrial excellence. For exclusive projects, the collection is also available in a luxury version upholstered in leather or Alcantara.

Design Pinuccio Borgonovo

La collezione "Alice" nel mondo mobile: composta da due cilindri in zama pressofusa che mordono una trafilata in alluminio, riprendendo le shapes emblematiche della raccolta.

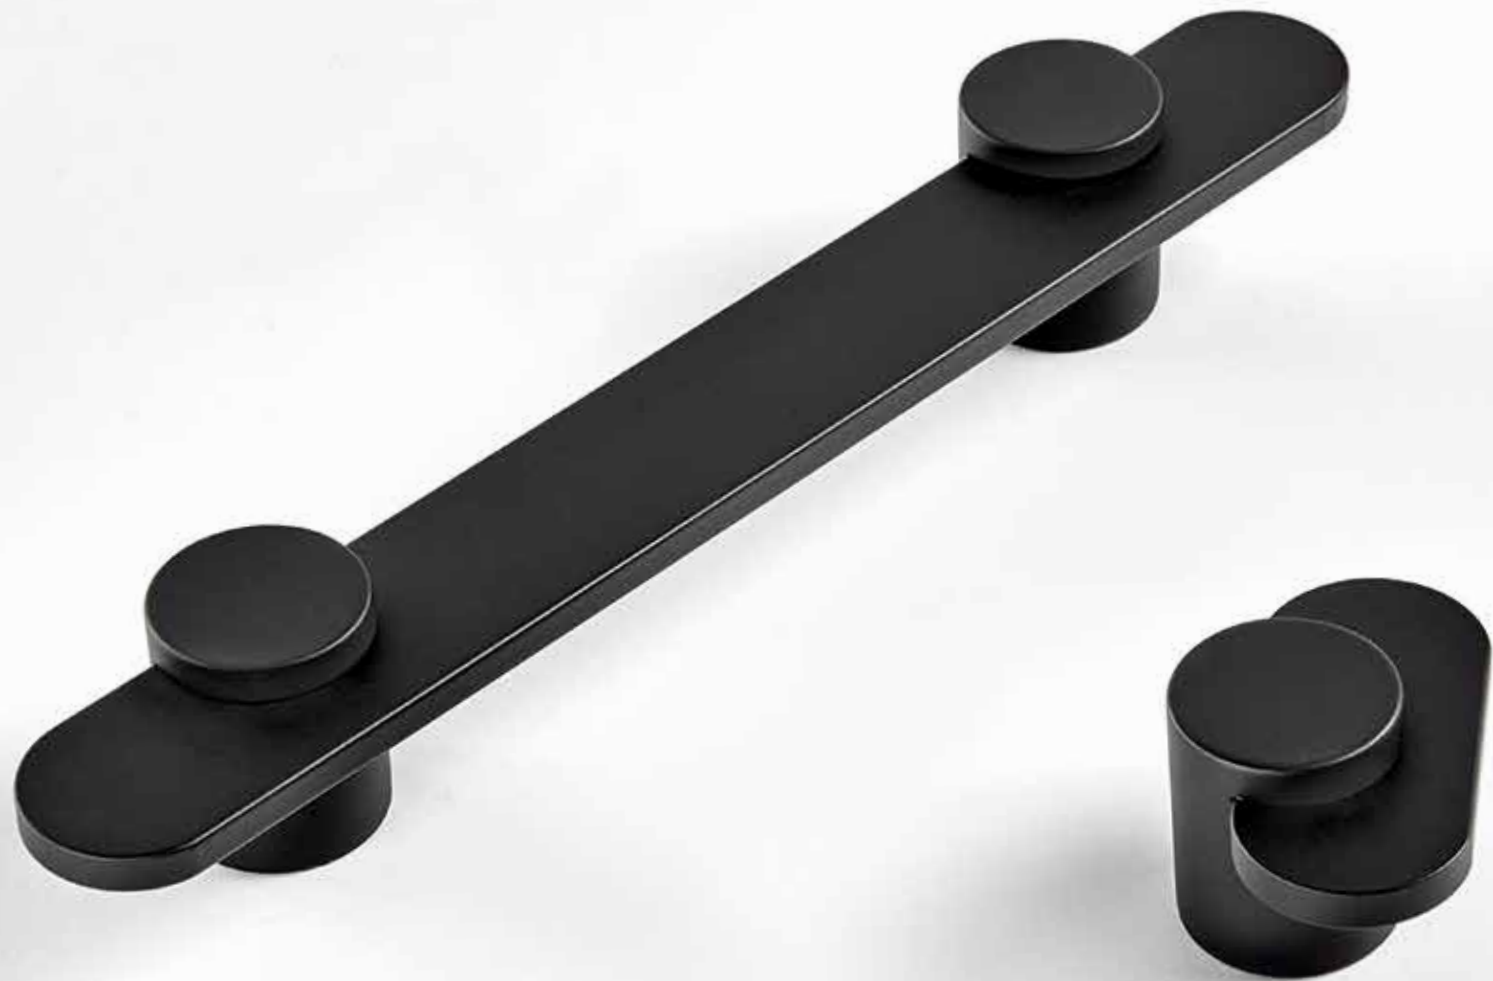

L'utilizzo di un estruso in alluminio dona robustezza all'impugnatura, nonché la possibilità di realizzare misure e finiture su richiesta.

The "Alice" collection for the furniture world: composed by two die-cast zamak cylinders biting an aluminum die plate, capturing the emblematic shapes of the collection.

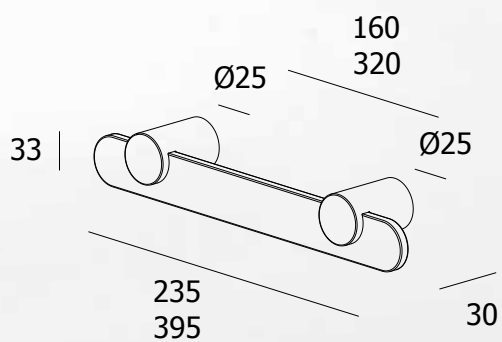

The use of extruded aluminum gives the handle strength, as well as the chance to create sizes and finishes on request.

COLLEZIONE

FLUID

Design Arch. Simone Micheli

Linee morbide, superfici continue, forma e funzione che si fondono in un unico gesto. La collezione FLUID, disegnata dall'Architetto Simone Micheli, nasce da una visione progettuale fortemente legata all'esperienza sensoriale e all'ergonomia del tocco.

Composta da una maniglia a leva e da un pomolo, entrambe realizzate in zama pressofusa, si distingue per l'approccio fluido e contemporaneo che le rende ideali non solo per contesti residenziali, ma anche per il contract alberghiero, dove estetica e funzionalità devono convivere con resistenza e affidabilità.

Le finiture, lucide o satinare, valorizzano il design essenziale, rendendo ogni elemento un piccolo oggetto d'architettura al servizio dello spazio.

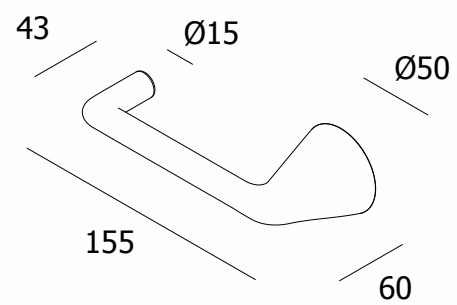

Soft lines, continuous surfaces, where form and function merge into a single gesture. The FLUID collection, designed by Architect Simone Micheli, stems from a design vision deeply rooted in sensory experience and ergonomic touch.

Composed of a lever handle and a knob, both made of die-cast zamak, the collection stands out for its fluid, contemporary aesthetic — ideal for residential interiors and especially well-suited to hospitality and hotel contract projects, where beauty, functionality and durability must coexist.

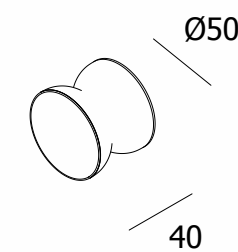

Offered in polished or satin finishes, each piece becomes a refined architectural element, elevating the environment with its pure and expressive design.

MN2700ZCP

PO2141ZCP

La finitura è per noi una forma di espressione progettuale. Infatti oltre alla forma e al modello, spesso è la finitura a dare quel qualcosa in più, facendo in modo che gli accessori si inseriscano perfettamente nell’ambiente prescelto e abbinandoli agli oggetti che li circondano.

Pamar propone un’ampia gamma di soluzioni estetiche, sviluppate per dialogare con materiali, stili e contesti differenti: dalle laccature opache in tonalità pastello, agli effetti metallizzati contemporanei, fino a texture speciali studiate su misura con riferimenti PANTONE o RAL.

A queste si affiancano le finiture galvaniche, realizzate attraverso cicli controllati e performanti che garantiscono elevata resistenza all’usura, brillantezza e profondità cromatica. Disponibili in varianti classiche e contemporanee, queste finiture valorizzano la materia senza comprometterne la sostenibilità.

Tutte le nostre superfici vengono trattate con tecnologie multistrato di ultima generazione, con vernici e processi formulati nel pieno rispetto delle normative ambientali più avanzate. I cicli produttivi sono ottimizzati per ridurre gli sprechi e minimizzare l’impatto ecologico. Grazie a un approccio flessibile e trasversale, Pamar è in grado di personalizzare ogni finitura, dialogando in modo fluido con le esigenze di architetti, designer e aziende, trasformando ogni progetto in un’esperienza unica.

Per maggiori informazioni, richieste campioni o preventivi personalizzati, il nostro ufficio commerciale è a completa disposizione. Contattaci e scopri come possiamo dare forma al tuo progetto.

For us, finishing is a true form of design expression. Beyond shape and model, it is often the finish that adds that extra something, allowing accessories to integrate perfectly into the chosen space and match seamlessly with the surrounding elements.

Pamar offers a wide range of aesthetic solutions designed to interact harmoniously with different materials, styles, and environments: from matte lacquers in soft pastel tones, to contemporary metallic effects, and even custom textures developed to match PANTONE or RAL references.

These are complemented by galvanic finishes, created through controlled, high-performance processes that ensure exceptional durability, brilliance, and chromatic depth. Available in both classic and modern variations, these finishes enhance the material while maintaining full commitment to sustainability.

All our surfaces are treated using cutting-edge multilayer technologies, with coatings and processes developed in strict compliance with the most advanced environmental regulations. Our production cycles are optimized to reduce waste and minimize ecological impact. Thanks to our flexible and cross-disciplinary approach, Pamar is able to customize each finish, responding fluidly to the needs of architects, designers, and brands—turning every project into a unique experience.

For further information, sample requests, or personalized quotations, our sales team is at your complete disposal. Contact us to discover how we can help bring your project to life.
